CORE Medical Education provides learning opportunities for medical, nursing and health support disciplines.

Sessions are presented by Nurse Practitioners and other clinical specialists, in an interactive environment. We specialise in small group training incorporating classroom and practical hands on procedural workshops.

Sessions can be tailored to your organisations specific needs, and we can come to your place of work to conduct some sessions.

You are committed to your practice, and we are committed to providing you the best education experience possible.

Acute Care Medical and Nursing

GP's and Practice Nurses

Nurse Practitioners, NP candidates and extended practice nurses
